

#SOEASY

LECHLER MAPP EASY *Process Efficiency Navigator*

The selection of the most efficient painting process will now be even **easier** with this new **application** designed for **decision makers**.

Caring about the differences!

EFFICIENCY BECOMES EASY

his tool speeds up the selection of the paint process by quickly identifying the **most efficient** solution for your repair.

LECHLER MAPP EASY *Process Efficiency Navigator*

It is an application useable on all computer storage media, such as PC, tablet, smartphone, designed by Lechler to guide the operator in the selection of the most efficient painting process.

Starting from specific information on the body shop and the type of repair, this APP proposes **the most efficient processes** selected from all the possible solutions and arranged according to one of the following criteria:

Cost-effectiveness

on the basis of total costs, comprising labour, energy and product costs

Speed

on the basis of total times, comprising labour and drying/flash-off times

Quality/Security

from a point of view of aesthetical aspect, durability/resistance and security in application

For each **CAR repair** set the following parameters in your **APP**

- **Type of colour**
(Solid, Metallic/Pearl, Effect)
- **Dimension of the damage**
(1 part, 2 parts, front, etc.)
- **Extent of the damage**
(minor, average, serious)

and you will immediately obtain the 3 most **EFFICIENT** solutions for your repair.

There is NO right process for ALL repairs, but there is a RIGHT process for EVERY repair
